

FOR IMMEDIATE RELEASE

Sensus Healthcare Announces the World Premiere of its Electronic Healthcare Records (EHR) System – Astrum™ EHR

Boca Raton, FL – February 2, 2011 – Sensus Healthcare has announced its new all-inclusive Electronic Health Records (EHR) system - Astrum™ EHR. Astrum™ EHR is offering a total solution without compromises that includes EHR, Practice Management, Patient Healthcare Records, e-Prescription, powerful merchant engines, and many other seamlessly-integrated features that provide unparalleled, state-of-the-art, and intuitive workflow and patient data management capabilities. Astrum™ EHR is powered by AZZLY®'s cloud-based operating platform that provides seamless and secure interdepartmental data exchange without any bridging, hardware, or software that need to be procured, installed, and maintained by the client, which Sensus refers to as True Clou-Fi™, geared for the Dermatology and Oncology market segments served by Sensus.

“We are addressing a dire need in the Dermatology and Oncology market segments for an affordable, scalable, and easy to implement EHR solution. Unlike many competitors in this field, we don't require expensive hardware, software, or service contracts. Our solution is based on AZZLY's state-of-the-industry, intuitive operating platform that streams data and functionality to a single dashboard. All the client needs is an internet connection and a web browser. We are platform-independent, so we protect our clients' infrastructure investment for many years to come and significantly reduce their ongoing cost of ownership. We are offering a very unique approach that was designed from its inception as a true web-based system to take on the challenge that many practices face today – seamless, intuitive, secure, and total integration of all their workflow and information facets.” –Kal Fishman, COO - Sensus Healthcare.

“We are pleased to work with Sensus Healthcare to bring an industry leading fully integrated EHR solution to serve the Dermatology and Oncology market segments. Through this strategic agreement, Astrum™ EHR users will have access to all the integrated features, functions and capabilities of AZZLY's EHR platform solution to deliver a client-driven streamline approach to workflow and to be compliant with the emerging industry regulations. We salute the Sensus Team in their vision to embrace new technology that is built on standards to support interoperability for now and for the future.” – Coletta L. Dorado, CEO - AZZLY®.

About Sensus Healthcare:

Sensus Healthcare specializes in making proven non-melanoma skin cancer solutions more accessible to patients. Our dedicated superficial radiation therapy (SRT) systems are designed specifically to provide an alternative to surgical procedures for basal cell and squamous cell carcinomas. Our mobile, compact SRT-100™ systems are used widely by oncologists and dermatologists to bring non-melanoma skin cancer treatment to more patients in more settings. We also offer a professional skin care line, Sensus Skin Solutions™, through our physician SRT-100™ users for their patients.

About AZZLY®

AZZLY® delivers an integrated One Click Patient Care Management EHR™ operating platform that provides a new level of intuitive, affordable clinical and administrative information systems that integrate and streamline the operations of physician practices and ambulatory clinics from check-in to check-out. The integrated solution utilizes a single front end, sign on and database, and can be easily scaled to meet the needs of both small, single-site practices and larger, multi-facility organizations. The AZZLY® EHR platform solution does not require expensive on-site servers or IT staff. The system's integrated features and interoperability capabilities allow clients to adopt an affordable EHR that provides intuitive ease of use

and affordability with technological forethought designed to meet Stages One, Two and Three Eligible Provider Criteria to qualify for ARRA HITECH meaningful use incentives.
