

## **AZZLY® All-Inclusive Clinical and Practice Management Solution Qualifies for CMS 2011 PQRS and eRx Incentive Payments**

**Vero Beach, FL, December 16, 2010** — AZZLY®, an innovative provider of workflow-enhancing ambulatory clinical and business solutions, is pleased to announce that CMS has qualified AZZLY EHR/PM/PHR to submit quality data to CMS by eligible professionals (EPs) for the CMS 2011 Physician Quality Reporting System (PQRS) and Electronic Prescribing (eRx) incentive programs.

“These incentive bonuses are one more reason why going “e” with AZZLY makes sense,” said Coletta Dorado, AZZLY President and CEO. “We’re delivering a platform built on required standards and codes to support interoperability on the back end while the user experience stays easy and familiar on the front end. As more requirements and opportunities are introduced over the next several years, whether through government programs, payers or others, the AZZLY platform provides the ease of use necessary to keep a practice at full patient load. This includes making qualifying for incentive payments simple and attainable — just as it does for Meaningful Use.”

The AZZLY solution is designed to reap maximum incentive payments with minimal effort by providers or staff. It captures PQRS, eRx, and MU measurements in a single database and shows eligible providers their daily status. Once quality and/or eRx reporting measurements are selected from the intuitive dashboard, the AZZLY EHR/PM/PHR electronic workflow creates the data file and submits it to CMS using their specified protocol. Providers and their staff avoid confusion and have more time to focus on patient care while AZZLY manages incentive payment tasks.

To achieve qualification status, AZZLY EHR/PM/PHR completed a thorough vetting process by CMS for each incentive program. For PQRS, this included demonstrating the ability to provide required data elements for 20 Physician Quality Reporting System measures. For e-Prescribing, it meant capturing and transmitting specified data elements for electronic prescribing measures to CMS in the required file format. AZZLY’s all-in-one solution clinical and practice management solution provides time savings and cost benefits daily —and with the tools to achieve incentive payments, it’s even more affordable.

### **About AZZLY**

AZZLY® delivers an integrated [One Click Patient Care Management EHR™](#) operating platform that provides a new level of intuitive, affordable clinical and administrative information systems that integrate and streamline the operations of physician practices and ambulatory clinics from check-in to check-out. The integrated solution utilizes a single front end sign on and database, and can be easily scaled to meet the needs of both small, single-site practices and larger, multi-facility organizations. The AZZLY EHR platform solution does not require expensive on-site servers or IT staff. The system's integrated features and interoperability capabilities allow clients to adopt an affordable EHR, [Practice Management](#), Revenue Cycle Management and [Patient Health Record System](#) that is client driven, provides intuitive ease of use and affordability with technological forethought designed to meet Stages One, Two and Three Eligible Provider Criteria to qualify for ARRA HITECH meaningful use incentives. ONC Certified EHR. CMS 2011 PQRS Qualified Vendor. Patient Care Management that makes sense. For more details, visit [www.azzly.com](http://www.azzly.com) or call 772-567-0206.
